achelos GmbH at [Hannover Messe 2025](#)

achelos GmbH is a manufacturer-independent software development and consulting firm based in Paderborn, Germany. Founded in 2008, the company develops and operates highly specialised products, solutions and services for security-critical applications in international markets.

Alongside general security-related topics, we focus on industry solutions in the healthcare, mobility, public and IoT segments.

Our customers and partners include government institutions, private companies and organizations with security requirements for digital applications. Our ideas, products and solutions in the field of embedded security have been incorporated into many national and international projects.

With "Qumate", achelos offers an extensive portfolio of tools and services for testing, simulating and checking the function and conformity of network connections and components in line with international security standards.

Our benchmark is ultimate IT security.

Therefore, we consistently develop products and solutions in line with the "IT Security by Design" approach.

Customers benefit from specific know-how, as well from our comprehensive, requirements-based areas of expertise along the entire process chain - from planning, development and to testing and implementation.

With qualified expert knowledge and pronounced technology expertise in the fields of cryptography and security, we are highly motivated to make the digital future a little more secure every day.
