Silvano Checchi inizia la sua formazione professionale lavorando come dipendente in un'azienda di Pescia che operava nel settore della floricoltura. Da questa esperienza e dall'intuizione che a Pistoia, il centro del florovivaismo italiano, mancava un'azienda commerciale in grado di fornire gli strumenti necessari per l'espansione del settore, nasce nel 1975 l'Agraria Checchi Silvano. Dalla prima "bottega" sul ponte di Bonelle, approcciandosi da oltre 40 anni con costante serietà e professionalità, l'Agraria Checchi è diventata oggi azienda leader nel mercato italiano ed internazionale. Estendendosi su una superficie di circa 45.000 metri quadri adibita alla vendita e al magazzino, con un impianto di miscelazione per substrati, e con personale qualificato e professionale sempre a disposizione del cliente, l'Agraria Checchi Silvano cerca ogni giorno di crescere, portando nel settore florovivaistico, mezzi tecnici sempre più innovativi, offrendovi le ultime tendenze del settore e anticipando le novità, riteniamo il nuovo catalogo strumento utile per la vostra azienda sia essa vivaio-garden center o azienda agricola.

A tutti un augurio di buon lavoro.

Silvano Checchi started his professional training working as an employee in a company in Pescia, which worked in the floriculture sector. From this experience and the intuition that in Pistoia, the centre of Italian nursery-gardening, a company able to supply the instruments necessary for the expansion of the sector was missing, in 1975 Agraria Checchi Silvano was established. From the first "shop" on the bridge of Bonelle, presenting itself for more than 40 years with constant reliability and professionalism, Agraria Checchi has become leader company on the Italian and international market. It stands on a surface of about 45,000 square metres destined to sales and warehouse, with a mixing system for substrates, and with qualified and professional personnel always at the client's disposal. Agraria Checchi Silvano every day tries, bringing to the nursery-gardening sector more and more innovative technical means, offering the latest trends of the sector and anticipating novelties. We believe that our new catalogue is a useful instrument for your company both if it is a nursery-gardening centre or a farm.

Good work to all of you.

Silvano Checchi commence sa formation professionnelle comme employé dans une entreprise de Pescia qui opérait dans le secteur de la floriculture. C'est à partir de cette expérience et de l'intuition que à Pistoia, le centre de la floriculture et de la pépinière italienne, il manquait une entreprise commerciale capable de fournir les instruments nécessaires pour le développement du secteur, que l'Agraria Checchi Silvano a été créée en 1975. Du premier <<magasin>> sur le pont de Bonelle, en se mettant à disposition depuis 40 ans avec sérieux et professionnalisme constant, l'Agraria Checchi est devenue aujourd'hui une entreprise leader dans le marché italien et international. L'Agraria Checchi Silvano, qui s'étend sur une surface d'environ 45 000 mètres carrés utilisée pour la vente et le dépôt, avec une installation de mélange pour les substrats, et avec un personnel qualifié et professionnel toujours disponible pour le client, essaie chaque jour de se développer, en apportant dans le secteur de la floriculture et de la pépinière des moyens techniques toujours plus innovants, vous offrant les dernières tendances du secteur et anticipant les nouveautés. Nous pensons que le nouveau catalogue est un instrument utile pour votre entreprise, soit un centre pépinière-jardinage soit une ferme.

Nous vous souhaitons à tous bon travail.

CONDIZIONI GENERALI

General conditions | Conditions générales

Dimensione, capacità e colori dei vasi sono puramente indicativi in quanto le materie plastiche sono soggette a ritiro. Per materiale rigenerato non è garantito.

Inoltre, le materie prime impiegate per la produzione, anche dello stesso articolo, possono essere di tonalità leggermente diversa.

L' Agraria Checchi Silvano S.p.A. si riserva pertanto il diritto di apportare modifiche alle caratteristiche senza nessun preavviso, nell'ottica di migliorare la qualità dei prodotti.

Size, capacity and colors vessels are only indicative because plastics are subject to recall. For regenerated material it is not guaranteed.

In addition, the raw materials used for the production, also of the same article, can be of slightly different shade.

Agraria Checchi Silvano S.p.A. It reserves the right to make changes without prior notice, in order to improve product quality.

Taille, la capacité et les couleurs des navires ne sont qu'indicatifs parce que les plastiques sont soumis à rappeler. Pour les matériaux régénérés, cela n'est pas garanti.

En outre, les matières premières utilisées pour la production, également du même article, peut être de teinte légèrement différente.

Agraria Checchi Silvano S.p.A. nous nous réservons le droit d'apporter des modifications sans préavis, afin d'améliorer la qualité du produit.

INNOVAZIONE, SOSTENIBILITÀ, ECCELLENZA: INFINITY

La natura è il cuore pulsante del nostro pianeta. È nostro dovere coltivare una profonda connessione con il mondo naturale e impegnarci a preservarlo nel miglior modo possibile.

L'economia circolare e l'ecosostenibilità rappresentano gli strumenti chiave per proteggere la natura. Ridurre, riutilizzare e riciclare sono azioni fondamentali per limitare l'impatto ambientale delle nostre attività, conservando al tempo stesso i preziosi habitat naturali.

Per questo ha preso vita Infinity, la rivoluzionaria linea di vasi da coltivazione nata dalla visionaria collaborazione tra **Lucart** e **Pasquini & Bini** e con il contributo del **Dipartimento di Scienze Agrarie, Alimentari e Agro-ambientali dell'Università di Pisa**. Questa linea di vasi, realizzati con materiale *GranPlast*, rappresenta un cambiamento epocale nel mondo della florovivaistica, con un impatto ecologico, positivo.

Infinity non è solo un vaso; è un simbolo del nostro impegno verso un futuro sostenibile.

Oltre all'aspetto sostenibile, Infinity offre una serie di vantaggi per la coltivazione delle piante:

1 Fitostimolazione

I vasi **Infinity** offrono un ambiente favorevole alla crescita delle piante, promuovendo la fitostimolazione e migliorando la salute delle radici. Il particolare composito utilizzato per i vasi Infinity, utilizzando substrati acidi dal pH inferiore al 4,5, genera un effetto di rilascio controllato delle sostanze contenute al loro interno. Questo effetto stimola la crescita delle piante invece di danneggiarle. **Gli esperimenti condotti hanno dimostrato che le piante cresciute nei vasi Infinity sono non solo sane ma addirittura più sviluppate rispetto a quelle cresciute in vasi tradizionali.**

2 Controllo della Temperatura

Grazie alle proprietà del **GranPlast**, i vasi regolano la temperatura dell'apparato radicale, creando condizioni ottimali per la crescita delle piante. Infatti, i vasi Infinity **riducono il surriscaldamento del substrato all'interno dei vasi durante la stagione estiva**, registrando temperature medie di circa 5/7 gradi più basse rispetto ai contenitori neri, con punte di 10° nelle ore centrali della giornata. Ciò comporta un notevole beneficio per le radici delle piante e, in generale, per la loro salute, riducendo lo stress al minimo.

3 Carbon Black Free

La totale assenza di carbon black **semplifica lo smaltimento** a fine coltivazione, rendendo i vasi Infinity una scelta sostenibile. Il vaso ha superato con successo i test di riciclabilità dell'**Institut Cyclos**.

Infinity è molto più di un vaso da coltivazione; è un impegno per un futuro sostenibile, un'iniziativa che dimostra come il riciclo e la sostenibilità possano andare di pari passo con l'innovazione.

Vaso VARIA - Vaso ERCOLE antispiralizzazione

VARIA - ERCOLE non rooting-circling pots

Pot VARIA - ERCOLE anti-spiralisation

I vasi antispiralizzazione, come il vaso VARIA ed il vaso ERCOLE, migliorano il drenaggio, mantenendo l'apparato radicale della pianta più sano. Il giusto mix tra acqua ed ossigeno aiuta la pianta a crescere in modo veloce. Le radici, durante il loro accrescimento, quando arrivano a contatto con l'aria tornano indietro. In questo modo non si crea il dannoso effetto della spiralizzazione. Questi vasi migliorano dunque il processo di crescita delle piante, annullando lo stress da trapianto e aiutandole ad attecchire senza problemi. La ripresa vegetativa sarà poi più energica e veloce. Il vaso VARIA ed il vaso ERCOLE sono maneggevoli e leggeri.

Anti-spiral pots like VARIA and ERCOLE improve the drainage keeping the root system of the plant healthier. The right mix between water and oxygen that helps the rapid growth of the plant. The roots, in the growth phase, as soon as they get in touch with the air, get back. In this way there will be no spiralling effect of the roots. These pots, therefore, improve the growth process of the plants, by cancelling the transplant stress and helping them to take root without problems. The plant rise will be more energetic and quicker. Pots VARIA and ERCOLE pots are easy to handle and light-weighted.

Les pots anti-spiralisation, tel comme les pots VARIA et le pots ERCOLE améliorent le drainage et, en conservant l'appareil radicale de la plante plus sain. Le mélange idéale entre eau et oxygène aide la plante à grandir rapidement. Les racines, pendant leur croissance, quand elle arrivent à l'air s'arrêtent. De cette façon il n'y a pas de spiralisation. Ces pots améliorent donc le processus de croissance des plantes, en annulant le stress de transplantation et en les-aidant à s'enraciner sans problèmes. La reprise végétative sera après plus énérgique et rapide. Le pot VARIA et ERCOLE sont maniables et léger.

Seguendo le esigenze dei nostri clienti, abbiamo sviluppato un nuovo modello di cassetta per coltivare le piante in modo migliore, per renderle ancora più robuste e sane. Al momento della vendita, la cassetta ERCOLE risulta essere compatibile all'inserimento nella cassetta CARINA, multicolore, che darà maggior risalto al vostro prodotto.

The production of a new box to grow plants is a need always been felt by customers. This is the best way to grow strong and healthy plants. When the time of sale comes, the ERCOLE box is suitable to enter in to the multicolor CARINA box in order to give greater accentuation to the plants produced.

Alveoli FERTISS

FERTISS blister trays | Alvéoles FERTISS

Fertiss è una zolla composta da un substrato speciale avvolto in uno strato di non tessuto. Sviluppato appositamente per favorire il ricircolo dell'aria e la fuoriuscita delle radici. Questa ricetta personalizzata a base di torba bionda e perlite dona a **Fertiss** un equilibrio ideale aria/acqua. La sua areazione assicura un drenaggio senza eccessi acqua o asfissia radicale. Si riumidifica rapidamente in modo estremamente omogeneo. La combinazione zolle/pannelli permette a **Fertiss** di esprimere al meglio tutte le sue qualità e i suoi vantaggi.

*Fertiss is a turf composed of a special substrate coated in a layer of non woven fabric. Developed specifically to favour air circulation and penetration of roots. This custom recipe based of blonde peat moss and perlite gives **Fertiss** an ideal air/water balance. Its aeration ensures drainage without excess water or root suffocation. It can be rapidly humidified again homogeneously. The combination turfs/trays allows **Fertiss** to express its qualities and advantages at best.*

*Fertiss est une motte de terre composée d'un substrat spécial recouvert d'une couche d'intissé. Développé spécialement pour favoriser le recyclage de l'air et la sortie des racines. Cette recette à base personnalisée de tourbe blonde et perlite offre à **Fertiss** un équilibre idéal air/eau. Son aération garantit un drainage sans excès d'eau ni asphyxie des racines. Elle se réhumidifie rapidement de manière très homogène. La combinaison motte de terre/panneaux permet à **Fertiss** d'exprimer le meilleur de toutes ses qualités et bénéfices.*
